Dear levgen

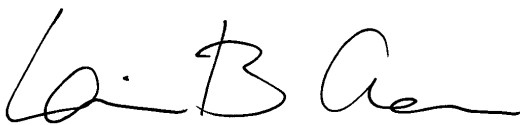

## RE RECENT PROJECT WORK

### *Testimonial*

Bell Ingram Design are delighted with the service provided by GISPoint in support of our work for our clients in rural Perthshire. The point cloud data from our local survey team was passed to your team in Ukraine and they turned it round into a useable 3D Revit model of the Grade B Listed Building more quickly than we could have hoped for.

At all times we were kept up to date with progress images, and the final product has proved to be a very robust basis for our design proposals. We will definitely be working with GISPoint again in the future.

Yours Sincerely

A handwritten signature in black ink, appearing to read "Iain B Cram".
